

DIGESTION PROBLEMS  
ALLERGIC PROBLEMS  
TUMOR & CANCER

### **Which food in case of problems?**

Diarrhea:

Something does not work, the digestion wants to get rid of it.

The digestion works with hundreds of different germs and fungi.

They grow and change according to the food they have to digest.

### **If food changes, the intestinal flora has to change.**

If food changes dramatically, the change needs more time  
AND often the digestion needs time to change accordingly.

In this time, it does not work well and it is accelerated so  
that wrong results (fermentation ) could not work out dramatically.

### **So ist a normal reaction.**

It's related to the case if some Poison or bad food had entered the digestion.

So my recommendation is, if some want to change with different kinds of food:

### **Do it on a monthly or weekly basis.**

If some diarrhea has happened, just change to an easy  
digestible food. Like PANEON.

We recommend SCHAF, in extreme cases with 1-3 scoops of AKTIV Powder, given  
with lots of warm water, stirred with the meal. So that you get kind of sauce.

(1-3g AKTIV for 10kg of bodyweight and meal)

AKTIV stopps diarrhea often overnight, at least it accelerates  
normalization of most stomach and intestinal problems very fast.

It detoxicates gratefully, as it does for humans.

It is a human product.

SCHAF+AKTIV is the top choice also for every allergic problem.

It is also the choice for auto-Immune problems and cancer.

Detoxication and healthy food is the solution for pets and humans as well.

The only difference is: It is much easier to do for pets, because they could not open the refrigerator  
AND they cannot go shopping to the supermarket and gas station.... :DDD
